Graduate Follow-Up Survey Highlights

A statewide survey of 2006-07 Ivy Tech graduates was conducted in December 2007 and January 2008. Selected results from the 2,688 graduates surveyed are presented below.

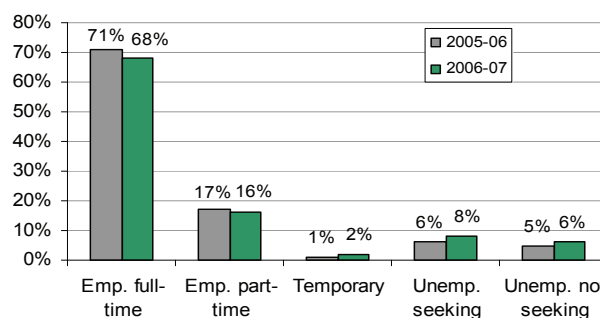

Key Findings

- Similar to 2005-06 graduates, the majority of 2006-07 graduates were employed full-time (68%), believed their current jobs were definitely related to their Ivy Tech education (65%), were already continuing their education or had future plans to do so (81%), and rated their Ivy Tech education as either excellent or good (89%). The proportion of 2006-07 graduates currently continuing their education (34%) was higher than the proportion of 2005-06 graduates doing so (28%).
- More than eight in 10 (84.4%) said they were either employed full-time or in school. Of the remaining 15.6%, 7.2% are employed part-time, and 5.6% are unemployed and looking for work.
- Almost all of the graduates (91%) said they achieved the educational objectives they set out to accomplish at Ivy Tech. This proportion is lower than the proportion of 2005-06 graduates who said they achieved their educational objectives (95%).
- About half of employed graduates (52%) worked for their current employer in some capacity before or while attending Ivy Tech.
- Six in 10 (61%) graduates said they received a salary increase since graduation from Ivy Tech. The average increase was close to 50%. Virtually the same proportion of 2005-06 graduates (62%) received an increase since graduation, but the average increase was less (39%).
- More than eight in 10 graduates (85%) said they were either very or somewhat satisfied with their current jobs. This proportion is lower than the proportion of 2005-06 graduates who were very or somewhat satisfied (87%).

Ivy Tech Student Penetration Update

- Indiana's total population of individuals aged 15-85+ is estimated to have increased by 66,702 from 2005 to 2007. The statewide number of residents aged 15-24 also increased (by 7,470) during this time period.
- Many Ivy Tech regions experienced population growth in both these age ranges, with the Central Indiana region experiencing the largest growth.
- On a statewide basis, Ivy Tech's enrollment penetration increased from 2005 to 2007 in both age ranges (up 0.1% among 15-85+ year olds and up 0.5% among 15-24 year olds).
- Twelve of the fourteen Ivy Tech regions also experienced increased enrollment penetration among both age groups.

Graduate Profile and Trends Report Highlights

Analyses of Ivy Tech Student Information System (SIS) statewide data on 2006-07 Ivy Tech graduates were also completed in April 2008. Selected results are presented below.

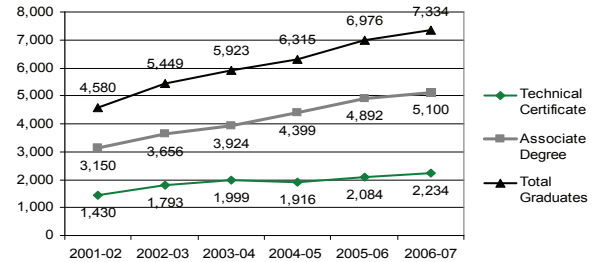

- The total number of 2006-07 graduates (7,334) was 5.1% higher than for 2005-06 (6,976).
- The Health Sciences division continues to be one of the largest divisions in terms of production of graduates, and continues to grow. It now represents four in 10 (41.2%) of all Ivy Tech graduates.
- Nearly two-thirds (65.6%) of 2006-07 graduates were female, and the average age was 31.8.
- Six in 10 (62.0%) of graduates completed one or more academic skills advancement courses.
- Average elapsed time for degree completion is four years for an associate of arts (AA) degree, just over four years for a technical certificate (TC), five years for an associate of applied science (AAS) degree, and just over five years for an associate of science (AS) degree.

ACT Student Opinion Survey (SOS) Highlights

The ACT SOS, a nationwide survey, was administered to 7,054 Ivy Tech students in October 2007. The survey gathered data about students' satisfaction with Ivy Tech, usage of College services and programs, and demographics. Selected highlights are presented below.

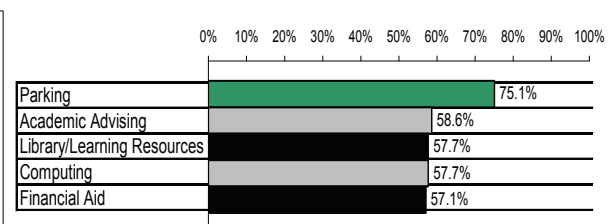

- Three questions measured students' overall satisfaction with the College on a scale from one to five (with five being the most positive): whether students would choose Ivy Tech again, their rating of the overall quality of education at Ivy Tech, and their overall satisfaction with the College.
- Ivy Tech's overall satisfaction remained stable from 2005 (4.06) to 2007 (4.05). Ivy Tech's 2007 average is lower than the national two-year college average (4.09) on this measure.
- Ivy Tech's 2007 average score indicating whether respondents would choose the College again (3.88) and rating of the quality of education at the College (4.05) are lower than the corresponding national two-year college averages (3.99 and 4.14, respectively) and Ivy Tech's 2005 averages for these measures (3.94 and 4.08, respectively).
- Fewer than six in 10 (58.6%) said they used academic advising; fewer than three in 10 (29.4%) said they used College orientation programs; and fewer than two in 10 reported that they used career planning (16.8%) or tutoring (13.2%) services.
- Students were most satisfied with Ivy Tech's class sizes (4.28). Satisfaction with the availability of courses at times students could take them was low (3.65).

Comparison of General Satisfaction Scores: Ivy Tech 2007 and 2005, and National 2007*

Scales: *1 Definitely No to 5 Definitely Yes; **1 Very Inadequate to 5 Excellent; ***1 Very Dissatisfied to 5 Very Satisfied.

Disability Support Services (DSS) Student Satisfaction Survey Highlights

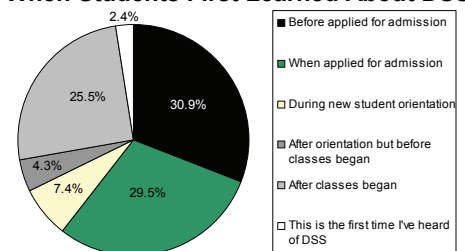

Usage of and Satisfaction with DSS Services

A survey was conducted in January 2008 among 477 students with self-identified disabilities.

- More than seven in 10 (72.5%) have used DSS services. Roughly seven in 10 (68.8%) of those who have used DSS either somewhat or strongly agreed that they were satisfied with the services.
