

CT-SCA™

SUPPLY CHAIN AUTOMATION SKILLS SUMMIT

Ivy Tech Community College Muncie/Henry County

The next frontier in workforce development for supply chain automation is here. Join us at the Ivy Tech Muncie-Henry County campus for an in-depth briefing lunch showcasing the **Certified Technician - Supply Chain Automation (CT-SCA) program**, a dynamic training and certification program developed by the **Manufacturing Skill Standards Council (MSSC)** in partnership with **Amatrol, Inc.**

- **November 7, 2024**
- 12:00 - 2:00 p.m.
- Ivy Tech Community College
- The Advanced Technology Center
- 4101 South Cowan Road
- Muncie, IN 47302

This program redefines the benchmark for technical training in automation technology for frontline technicians. In the wake of a significant uptick in automation adoption across the distribution/logistics sector, the industry faces pressing challenges in talent development heightened by the evolving market dynamics post COVID.

Ivy Tech's new innovative program addresses these needs, equipping professionals with comprehensive skills in Electrical, Mechanical, Fluid Power, and Automation to navigate the complexities of an increasingly automation-dependent industry. At the program's core lies the Skill Boss Logistics, an advanced hands-on training and testing apparatus developed by Amatrol.
